

Did you know?

Royal Homes supports the United Nations Sustainable Development Goals. Specifically goal 12.5 which is to substantially reduce waste generation through prevention, reduction, recycling and reuse. The Royal Homes factory reduces waste by reusing scrap and has had a recycling program for many years. We feel that prefabricating our homes in a factory allows us to better control how scrap materials are handled. This control enables us to efficiently minimize the amount of waste that goes to landfill.

Georgian 3-plex
